THE BIG EASY® INFRARED SMOKER, ROASTER & GRILL *Available at Retailers Nationwide*

The Big Easy Infrared Smoker, Roaster & Grill from Char-Broil (**SRP: \$199.99**) is the ultimate three-in-one outdoor cooker. Whether you're smoking ribs, roasting chicken or grilling steaks, this new extension of The Big Easy collection features temperature controls and accessories to accommodate a variety of cooking and smoking styles.

The Big Easy Infrared Smoker, Roaster & Grill takes up little space, but can accommodate up to a 25-pound bird. Powered by propane, the cooker's versatility makes it a great patio companion to the outdoor grill, but can easily serve as the only cooker in the backyard.

How It Works

The Big Easy Infrared Smoker, Roaster & Grill is powered by propane and cooks with one of the grilling industry's most popular cooking technologies: infrared heat. The rotary ignition gets it going with one easy turn of the dial.

Between the outer wall and inner wall of cooker is a fully enclosed, specially designed propane burner. The heated inner wall radiates natural infrared heat that penetrates food evenly and seals the juices inside.

The hot air that is generated escapes out of the top of the cooking chamber before it has a chance to dry out the food. The result is meat that stays moist and tender. Drippings captured in the Pull-Out Grease Tray can be used for gravy and other stovetop recipes.

Smoke: *Wood chips or pellets can be placed in the stainless steel smoker box for those who love a smoky flavor.*

Roast: *The Roasting Basket is an easier alternative to the traditional rotisserie. Simply place the meat in the basket and place the basket in the cooker.*

Grill: *By placing meats and vegetables on the stainless steel grates you can grill up juicy meats and vegetables without flare-ups.*
